What is Twitter?

Twitter is a free microblog, or social messaging tool that lets people stay connected through brief text message updates -- up to 140 characters in length. Twitter is based on you answering the question what are you doing? You can post thoughts, observations and goings-on during the day in answer to that question. Your update can be posted on your Twitter profile page through SMS text messaging, the Twitter Web site, instant messaging, RSS, e-mail or through other social applications and sites, such as Facebook.
